Requirement	Description	
Constant Documentatio	At the end of any of every Session, a documentation text has to be written, consisting of: - knowledge gained - why something was implemented in a certain way - things we decided - things that changed	
Language	We decided to use C++ as programming language and cmake for platformindependence.	
GUI	For GUI purposes we want to use the gtk since its platform independent.	
Architecture	We will use the Model-View-Controller Architecture for easy differentiating and expandability.	
IDE	As IDE we use Eclipse.
